

Accudock Dock of the Month

The City of Lake Stevens contacted Accudock last summer to develop and build a custom rowing dock to replace an old wooden dock. The 8' x 90' low profile rowing dock plans called for 25% light transmission panels which required engineering to come up with a custom solution. Accudock was able to fabricate the custom pieces to meet the unique requirements and provided a brand new dock for the City of Lake Stevens that was assembled Dec. 2011

Month:

February 2012

Location:

Lake Stevens, WA

Event/Club:

City of Lake Stevens, WA
