

Accudock Dock of the Month

Month: January 2012
Location: Knoxville, TN
Event/Club: Office Park

Accudock was called upon to build a floating dock with ramp for an office park in Knoxville, TN. Using our heavy duty aluminum framed dock, we fabricated two 8' x 16' sections and an 8' x 24' aluminum gangway. All components of this setup were decked with a hard PVC composite decking of choice for an aesthetic finish, and it was installed in the last week of 2011.
