Dear Water Enthusiast,

Since our inception in 2007 our mission first and foremost has been to treat every customer like family and to ensure they receive extraordinary customer service and are completely satisfied. We proudly stand behind our quality floating dock products 100%, taking a personal interest in every purchase.

We are blessed with a great team that is dedicated and passionate about ensuring the service and support they provide are top notch.

Warm Regards,

John Harrison
Owner/President, AccuDock

Jason Harrison
General Manager, AccuDock
AccuDock is a global leader in the design and manufacturing of floating docks for all market segments. Our team strives to provide each customer with an exceptional experience and the highest quality product.

AccuDock is ISO 9001:2015 Certified. The ISO 9001:2015 Quality Management System certification enables AccuDock to demonstrate our commitment to quality and customer satisfaction, as well as continuously improving our company’s operations. ISO certification is an internationally recognized quality management system and is the preferred solution for organizations worldwide.

- 12 Adjustable Rollers to Accommodate any PWC Hull on the Market
- 6’ Width Provides Maximum Stability and Ample Space for Loading and Unloading
- Bow Stop included for Safety While Docking
- Widest Most Buoyant on the Market
- High Quality Not Comparable to Cheaper Options
“When the Devon Boathouse opened on the Oklahoma River, we recognized the need for a dock that could fit the unique blueprint of our inlet. AccuDock worked with us to create the right pieces that fit our space while simultaneously complementing the distinctive architecture of our facilities in the Boathouse District.”

Mike K. Executive Director

Oklahoma City Boathouse Foundation – Oklahoma City, Oklahoma
ROWING

**What is an AccuDock Work Float made out of?**

Each float consists of a high density polyethylene (HDPE) plastic, which completely encapsulates a block of EPS foam.

**What is the surface texture?**

The surface is the same plastic as the sides and bottoms. It is a non-skid levant texture finish which is a slightly raised texture providing excellent traction. The surface is not slippery when wet and because of the white color, it is cool to the touch even during hot summer months.
CAMPS AND PARKS

AccuDock has been the premier floating dock choice for Camps and Parks for over 10 years. Our dock’s design provides the ability to be as close to the water surface as possible which is essential for most outdoor water sporting activities. Due to our unique build design we can customize your dock for better ease off and on the water.

**BENEFITS**

◊ ADA Compliant Options Available
◊ Low Profile Easy Use for Swimmers and Water Sports
◊ Excellent Stability, Load Capacity and Anti-Skid Surface
◊ Made in the USA

GANGWAYS AND RAMPS

AccuDock manufactures all gangways and ramps in house using 6000 Series Marine grade aluminum. Each gangway and ramp is built to customer specifications based on customer and application requirements including ADA specifications when required. All AccuDock gangways and ramps are welded by AWS (American Welding Society) certified welders ensuring the utmost in quality and functionality.

AccuDock manufactures a complete line of floating docks that meet ADA (American Disabilities Act) requirements. We provide wheelchair access to many waterfront locations, our unique design allows people with disabilities to easily access many areas that were not previously accessible. Our ADA Transfer Platform and Safe Launch Systems offer an even further degree of safety ensuring all outdoor enthusiasts are able to enjoy the water.
ENGINEERING DESIGN

SAMPLE DRAWINGS

Our engineering department uses the CAD program SolidWorks to do 3-D modeling. We can provide CAD drawings to help our customers get a visual of their dock project, as well as specific dimensions and fabrication details.

CROSS-SECTIONS

We provide cross-section drawings for all our different floating dock types. These drawings give good insight into how the docks are constructed with regards to the material and style.

PERMIT DRAWINGS

If you need to obtain a permit for your floating dock project, we can provide a drawing with specific engineering details that are typically required for permitting, such as buoyancy ratings, footprint of flotation, attachment and/or anchoring details.
