PART: Aluminum Full Frame Design Piling Hoop Bracket  REF #: ATT - PMD

Your First Choice for Floating Dock Solutions
NOTES:

Standard Aluminum Full Frame Design Piling Hoop Bracket has an ID that is 2" larger than the piling diameter or width.

For example a 12" diameter piling or a 12" x 12" square piling will get a hoop bracket with a 14" ID.

This allows for a 1" gap all around the piling to prevent binding.
